About
I am a first-year B.Tech student with a keen interest in Artificial Intelligence and Machine Learning. I am passionate about exploring how technology can solve real-world problems and improving my skills in programming, data analysis, and AI/ML development.
Currently, I am focused on building a strong foundation in Python, data structures, and machine learning concepts while actively participating in online platforms like GitHub and Kaggle to practice coding and project development.
I aim to contribute to open-source projects, collaborate with like-minded peers, and take part in competitions to enhance my learning. My goal over the next few years is to gain hands-on experience through internships, academic projects, and research opportunities that will prepare me for a professional career in AI/ML.
I am eager to connect with fellow students, mentors, and professionals in the tech community to exchange knowledge and explore innovative ideas.
Education
Vellore Institute of Technology
Bachelor of Technology - BTech, Computer Science
2025 – 2029
Activities and societies: Participating in hackathons, coding competitions, and online challenges
Active contributor on GitHub and Kaggle for learning and projects
Volunteering in digital literacy awareness and student tech workshops
Engaged in collaborative group projects and peer learning sessions
Currently pursuing a B.Tech degree with a focus on Artificial Intelligence and Machine Learning. Building a strong foundation in programming, data analysis, and algorithmic problem-solving. Actively engaged in projects, online platforms like GitHub and Kaggle, and skill development initiatives to gain hands-on experience and prepare for future internships and professional opportunities in technology and AI/ML.
